DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification. Newly presented claim 22 discloses “a wireless receiver comprising: a rake receiver having a plurality of combiner elements...and combiner weight calculation unit... across multipath components of a received signal.” Examiner is unable to find support from written specification or the accompanying drawings of the application.

Allowable Subject Matter

3. Claims 1-21 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:
The instant application discloses methods and apparatus for determining log likelihood ratios (LLRs) for code symbols. An extensive search of prior art records fail to teach methods or apparatus “determining a gain vector relating the plurality of code symbols and the plurality of pilot symbols in accordance with channel characteristics; and using the gain vector to determine

likelihood values of a designated code symbol..." along with the remaining limitations of the independent claims,
